

BENEFITS OF USING BIOSOLIDS

- A slow release source of plant-available nitrogen and other vital nutrients
- Improves overall plant growth and crop yields
- Provides organic matter for improved soil health
- Offers a cost-effective alternative to commercial fertilizers
- Spread with conventional farm equipment
- May also provide lime (CaCO_3) & potassium (K)

To help with your Biosolids application needs we offer spreading services and spreader rentals.

Your Partner from Start to Finish

All **Heart & Soil**® products are produced locally and designed to enhance soil productivity and crop yields in a cost-effective and environmentally sound manner. Let our qualified staff assist you in determining the best application for your operation.

Heart & Soil®, a division of RMI, partners with farms throughout the Northeast to build healthy soils.
