

Heart & Soil Ag Products

PAPER FIBER

Paper Fiber

Build organic matter and maintain pH balance – naturally.

Paper Fiber increases organic matter, adds lime and improves water holding capacity to resist drought. Paper Fiber is used as a soil amendment to revitalize and enrich topsoil, preserving and enhancing a farm's most critical resource.

Paper Fiber is an excellent choice for use in topsoil improvement, land reclamation, agriculture and more.

BENEFITS OF USING PAPER FIBER

- Increases organic matter in sandy soils
- Improves water holding capacity; drought resistant
- Improves soil fertility as pH increases
- Presents excellent bulking qualities for aeration and soil structure
- Mixes into existing soils easily

To help with your Paper Fiber application needs we offer spreading services and spreader rentals.

Your Partner from Start to Finish

All **Heart & Soil®** products are produced locally and designed to enhance soil productivity and crop yields in a cost-effective and environmentally sound manner. Let our qualified staff assist you in determining the best application for your operation.
