

Heart & Soil™ Ag Products

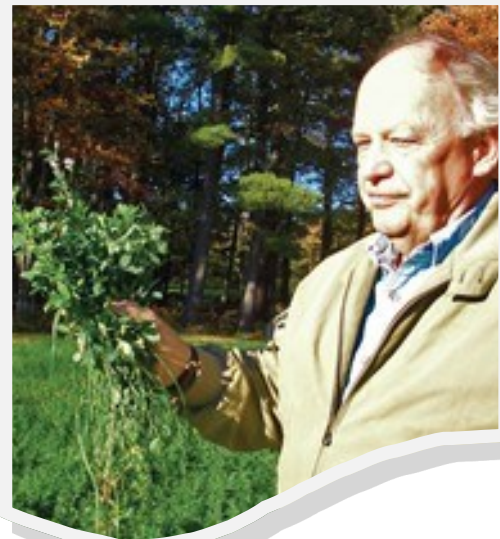

WOOD ASH • BIOSOLIDS • PAPER FIBER • ENGINEERED TOPSOIL

Meadow Farm Northwood, NH

For several years, the fields and pastures at Meadow Farm have been nourished by *Biosolids* provided through RMI's *Heart & Soil*® line of products. *Biosolids* are an excellent fertilizer that offers slow-release nitrogen. Doug & Janet Briggs applied *Biosolids* to hay fields and pastures surrounding their 1760's home in amounts prescribed by RMI agronomists.

Having improved the soil pH, fertility and yields to an extent he finds quite remarkable, Briggs continues to maintain Meadow Farms alfalfa fields by topdressing with *Wood Ash*.

Both *Biosolids* and *Wood Ash* are available for agricultural operations throughout New England.

“the most beautiful alfalfa anyone could ask for...”

Doug Briggs, Meadow Farm, Northwood, NH
