

Heart & Soil[™] Ag Products

WOOD ASH • BIOSOLIDS • PAPER FIBER • ENGINEERED TOPSOIL

Mike Leclair Churubusco, NY

The land Mike Leclair was farming had become weedy in recent years and Mike knew that the pH was low and that potassium levels were probably not good as well. After a visit from RMI, Mike was convinced to give **Heart & Soil[®] Wood Ash** a try .

Mike took delivery of 100 tons of **Wood Ash** from RMI. The material, produced at the Boralex Chateaugay Power Station, was spread on some land that he rents and by the end of the growing season Mike was more than pleased with the results.

The potassium and lime in the **Wood Ash**, along with an all-natural package of trace minerals, went right to work transforming the field into a high producing meadow of grass and clover. The **Wood Ash**, when combined with manure, made this meadow a pleasure to harvest ... ask Mike!

“The grass was greener, thicker and produced a much higher yield - I was able to make something out of nothing.”

~ Mike Leclair, Churubusco, NY
